

**The City of San Luis Obispo would like to announce the following information:**

For any agent or Realtor selling a home within the City of San Luis Obispo, we would like to provide complimentary flow measuring bags to help you in ensuring your client has low flow plumbing fixtures for our Plumbing Retrofit Verification Program.

To test the flow rate of current showerheads and faucets, the flow bag comes equipped with clear instructions for measuring flow rate and takes no longer than a few seconds to perform.

Residents may further request our additional complimentary conservation items by calling our Water Resources division at 805-781-7212. The showerheads and faucet aerators are easy swaps a property owner can do prior to certification.

Please come by our office at 879 Morro to pick up flow rate measuring bags and advise your clients living in the City to pick up our additional items!

<b>Complimentary Water Efficient Fixtures</b>		
	<b>Shower and Faucet Flow Rate Measuring Bag</b>	Measure your faucets and showerheads to ensure the flow rate matches what its stamped with. It takes only 5 seconds.
	<b>Low-flow Showerhead</b>	Reduce the power in your shower and save water immediately with this 3 settings low-flow showerhead. This showerhead provides efficient flows at 1.25, 1.5, or 1.75 GPM
	<b>Dual Spray Faucet Aerator with Pause Valve</b>	These faucet aerators save 32% more water than standard faucets and have two flow settings. An integrated pause valve also allows users to reduce flows to a trickle while keeping temperature consistent.
	<b>Adjustable Kitchen Faucet Aerator</b>	Customize your faucet with an adjustable faucet aerator that allows for 0.5, 1.25, or 1.5 GPM flows.
